Data Catalog & Business Glossary

Store insights automatically from all Ataccama ONE modules, improve and enhance metadata, share with other users, and leverage those findings for future projects.

Keep track of your insights with the Ataccama ONE **Data Catalog**—the core component of the Ataccama ONE data curation platform. Acting as central storage for metadata, the Data Catalog automatically stores metadata about everything that is happening in all Ataccama ONE modules.

The **Business Glossary** allows you to collaboratively agree on terms in your organization. Terms are automatically mapped to real data sources in the Data Catalog during profiling, ensuring the Data Catalog is always up-to-date and synced with the Business Glossary.

Use Cases

Data Catalog

Take advantage of a **comprehensive metadata management module**, providing central storage for all metadata ever discovered or created in Ataccama ONE. This information is easily accessible and can be leveraged for future projects, providing the full context and native support for information governance. Search for entities across multiple data sources in one **business-friendly interface**.

All metadata is accessible via an API or the Ataccama ONE application, leveraging its common features such as self-service configuration, collaboration, workflow, and **machine learning powered insights**. The Data Catalog primarily provides value to data stewards and information

workers, while enabling internal and external systems and algorithms to access the same metadata.

Business Glossary

Manage your business terms and **automatically map** them to existing data sources in the Data Catalog keeping them **synced** and **up-to-date**. Custom hierarchy structure allows organized storing of items into an unlimited hierarchy structure.

Collaboratively agree on used terms, their definitions and policies, and how to use the data with your colleagues to ensure everyone in the company is always on the same page.

Gartner Peer Insights

Companies across a variety of industries trust Ataccama to manage and improve their data.

Metadata Discovery & Definition

Overloaded with hundreds or thousands of unknown data sets? Afraid of the sheer amount of manual configuration it will take to start working with your data? Employ smart, automated metadata discovery algorithms instead—and spend your time where it really counts.

Term	Hierarchy	State
Party		Active
Broker	Party	Active
Underwriter	Party	Active
Insured Party	Party	Active
Broker legal name (BLN)	Party > Broker	Active
Underwriter legal name	Party > Underwriter	Active
